With the required sorting order/view to be used in the prompt

### #3 Personalize the prompt

Via MNS175 – Option 21 – Simulate modification – it's possible to customize the headings and display:

The screenshot shows the Infor M3 interface for the 'Parcoursir M3' window. A table with columns 'Code article', 'Nom', 'Famille produit', 'Sous-famille', 'Stock dispo', 'Prix vente', 'Dev', 'DAP', and 'Sit' is displayed. The table contains a list of items, including 'Item name 001000007', 'Whey Concentrate', and 'Item name 001000007'. The 'Item name 001000007' row is highlighted in red, and a red triangle icon is visible in the 'Sit' column for this row.
