## Purchasing workflow module

THE solution for purchasing workflow automation into Infor M3®

### Integration

A native Infor M3® connection

### Ease of use

Intuitive business interface

### Collaboration

"Purchase to Pay" flow module

### Why automate your purchasing process?

Companies' finance departments are facing new challenges to improve the flow of the automation chain.

Rational thinking needs to rely on comprehensive solutions able to manage the various aspects of the "purchase-invoice-payment" flow.

Since the Purchasing function must increasingly be part of a strategic alignment process, purchasing automation means:

- Controlled and secured expenses: real-time budget control,
- Streamlined administrative tasks,
- Easier reconciliation processes,
- Compliance with delegations of authority (internal control, SOX rules),

### Choose the AIP purchasing workflow

#### • A unique application

The AIP purchasing workflow is a solution fully integrated into Infor M3® for automating the Purchasing process. It requires no additional configuration to connect with your ERP. The M3® connection is direct and your users will immediately be at ease with the tool without changing environment.

#### • A Purchase-to-Pay flow module

This AIP module will integrate perfectly into a global system for automating the Purchase-to-Pay process. Used in stand-alone mode or as an addition to your supplier invoice automation system, AIP purchasing workflow is a perfect complement to your M3® ERP.

**“**...To avoid any break in the 'Purchase-to-Pay' flow, it is important to consider 'seamless' automation of the purchasing process in advance...**”**

- Better supplier traceability.

#### • Authentic expertise

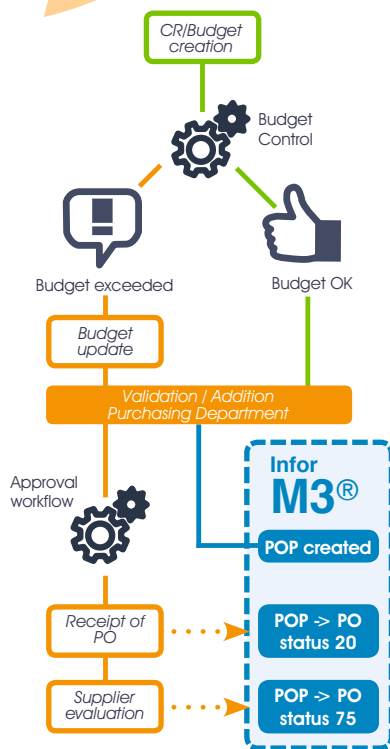

With years of experience in ERP optimization, particularly M3®, Authentic's team of developers and consultants delivers high-quality professional business solutions.

## Purchasing automation

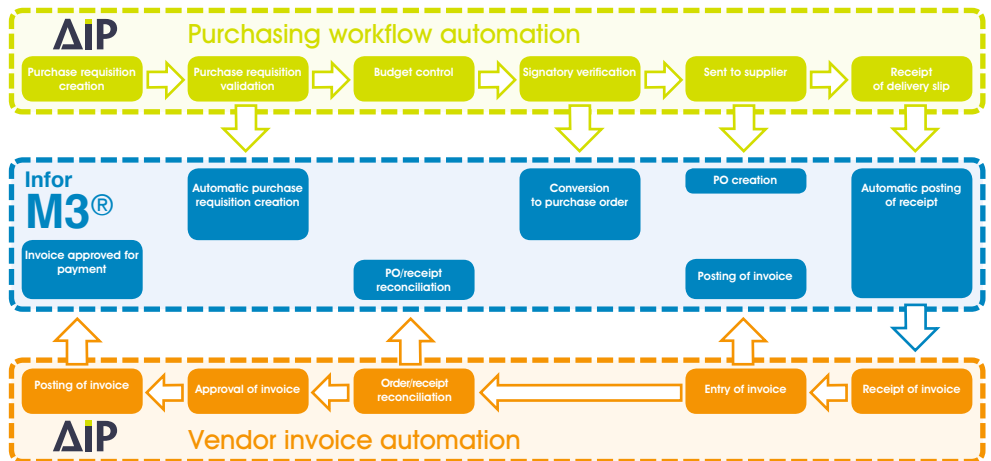

### The workflow of a CR

A Commitment Request (CR) corresponds to a series of user purchase requisition lines. The various actions generated in the purchasing workflow will automatically trigger impacts in M3®.

### A Purchase-to-Pay flow module

The AIP purchasing workflow is one of the modules of the AIP collaborative Purchase-to-Pay application offered by Authentic.
