Packaging

Why is 13.4 so important

M3 13.4 is the final 13.x release (Long Life Cycle)

Infor OS enabled, customers can take advantage of all the value delivered by Mingle/ION/Mobility...

Launchpad Version/Release for our go forward Cloud Edition version of M3 and our Multi Tenant CloudSuites

The extensibility toolings in 13.4 are the foundation for further developments in this area and will benefit all customers

Next major version On Premise (M3 19.1) is planned to be based on Cloud Edition functionality and integrations merged with the latest technologies

When on 13.4 – Prepare your move to the future

Utilize the power of Infor XI

- Prepare the move to thin client – M3 H5 Client
 - Move scripts and Mashups to thin client
 - Rebuild custom developments in Mashup SDK
- Re-architect integrations using ION
 - Based on BODs
 - Publish subscribe patterns (as opposed to batch)
- Utilize ION Workflow and Alerting
- Create role based homepages
- Create contextual applications
- Utilize IES for task oriented selections

Remove Tech Legacy

- Remove Java mods – use Extensibility
- Move to Configurable XML for documents
- Remove all SQL calls – replace with APIs
- Remove all DB triggers – use EventHub
- Remove shared folders – use sFTP
- Use IFS (SAML) for security
- Archive your data – create archiving policies
- Create a patch policy to ensure to stay current, factor into extensibility
- Gradually remove Apps not suited for Cloud
- Gradually remove legacy components (Apps, integrations, etc)

Strategically below components are going away – all supported for 13.4 but...

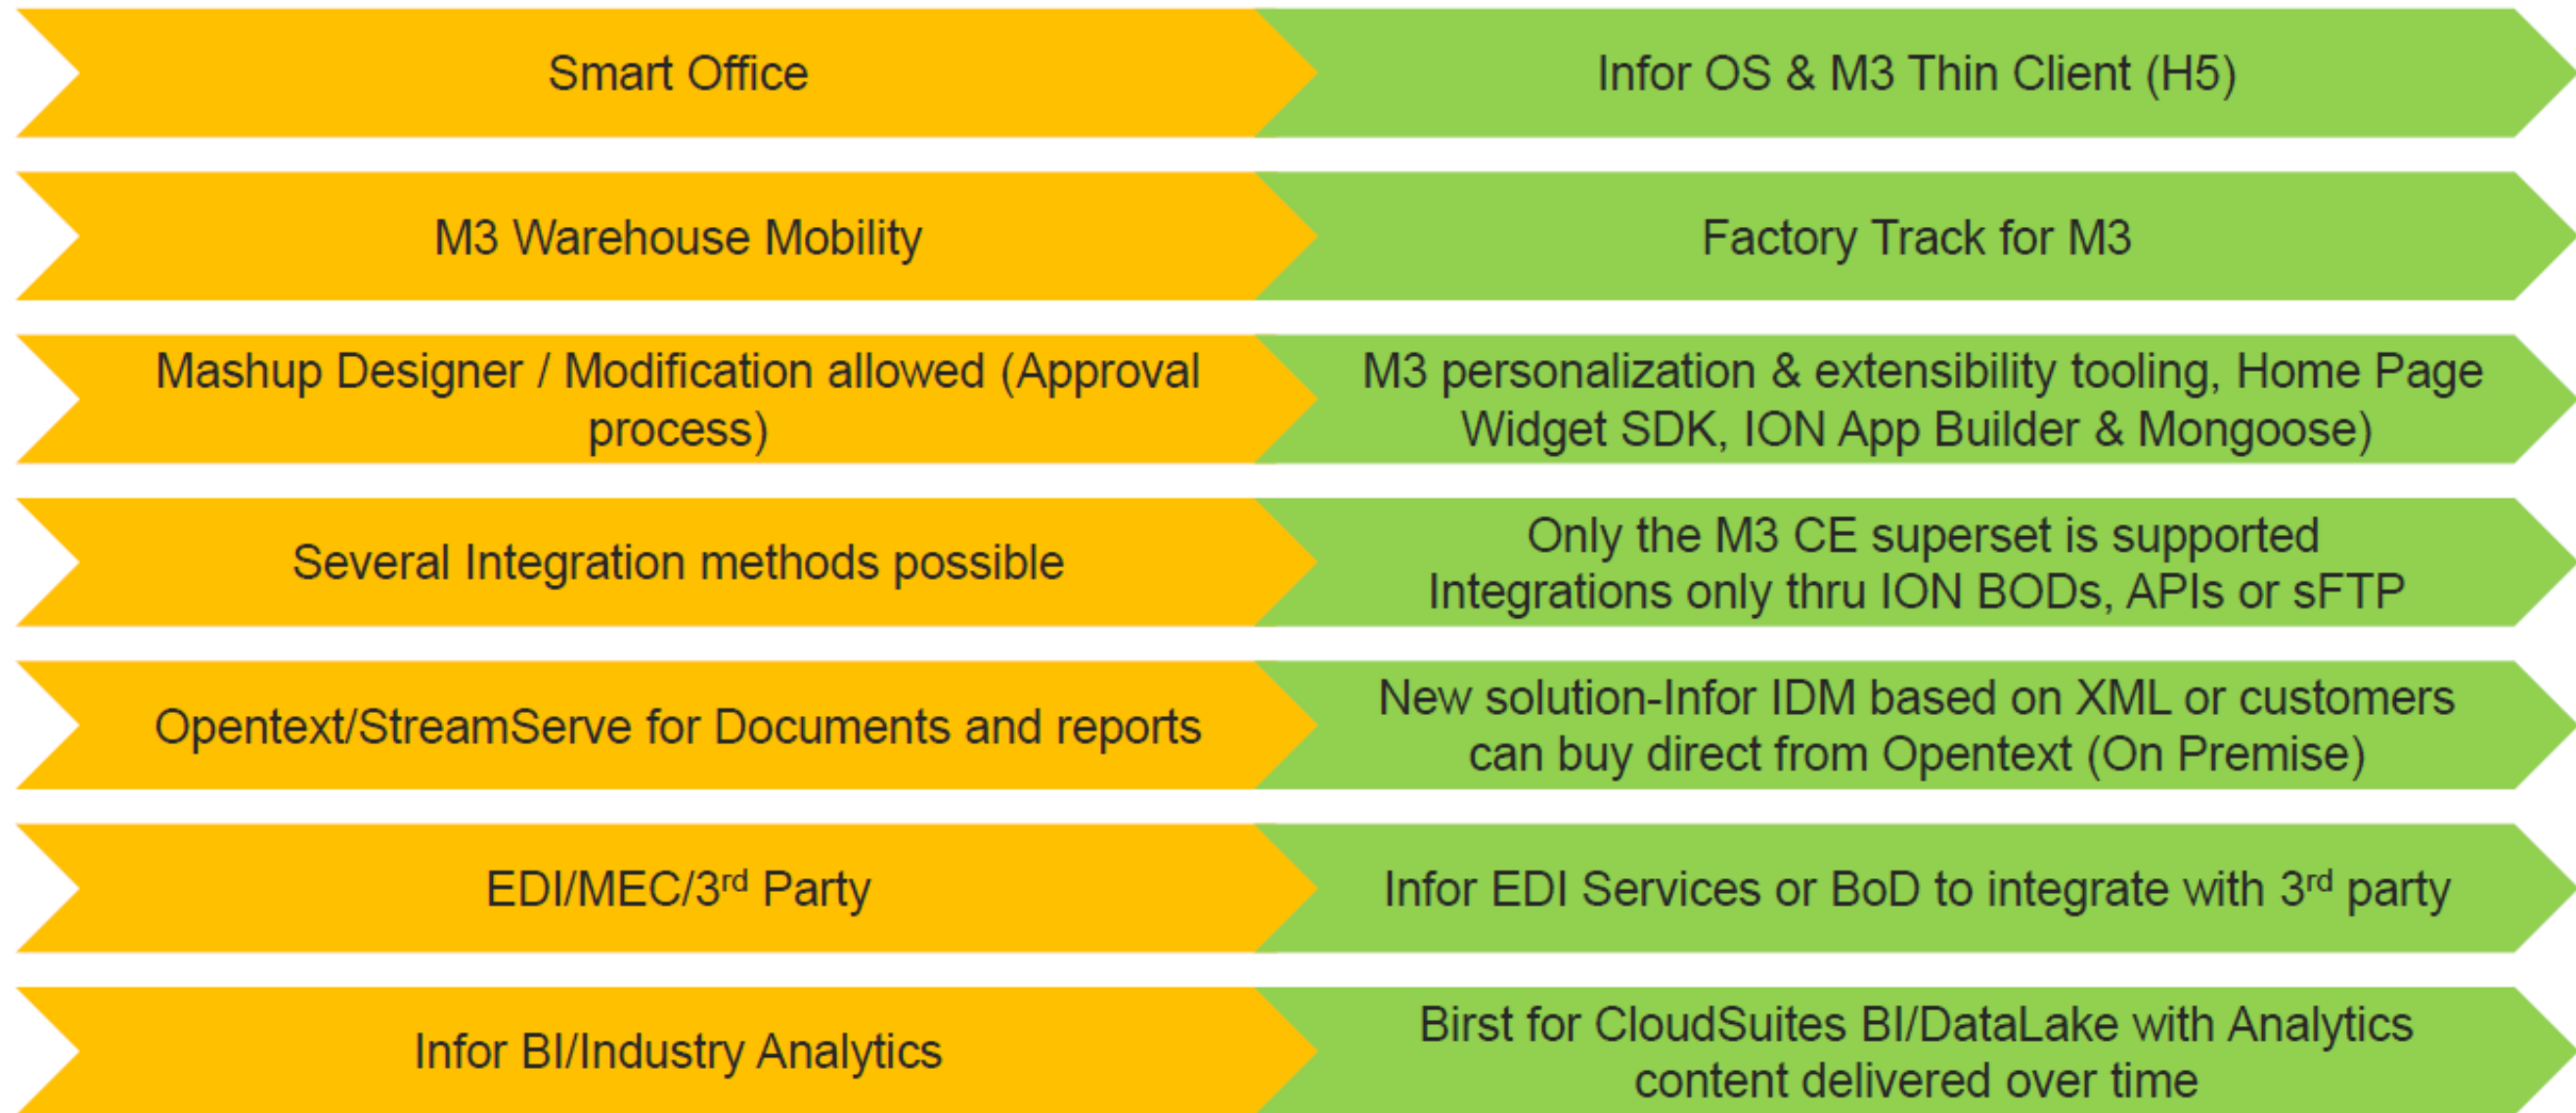

- IPA → ION Workflow
- LBI → Infor BI/Birst
- ISO → M3 H5 Client/Mingle
- Mashup Designer → Infor App Builder

Why Cloud Edition

- Technically rearchitected for cloud
- Built for high volumes and user counts
- It's Multi Tenant
- It's resilient
- It's built for flexible scaling
- It's Single Version of the Software
 - Continuous updates/fixes without disturbing existing processes (No Upgrades)
 - Parameter controlled new functionality
- It's the primary platform for new functionality

M3 Cloud Edition Same but Different

Cloud Only
