

Spare parts

Pre-configured solution for the spare parts distribution industry

Specialized

A solution made for your market segment

A la carte

Selection of industry processes and connectors

Scalable

New features added periodically

IMPLEMENTATION ACCELERATOR FOR YOUR INDUSTRY

- 
REDUCED ACQUISITION COST
with the annual subscription model and lower project costs
- 
REDUCED PROJECT DURATION
thanks to a framed approach and an additional and precise pre-configuration
- 
REDUCED COST OF OWNERSHIP
with a multi-tenant cloud model and optimized upgrades

Due to the consolidation and evolution of your industry as well as the entry of new players in the market. You have no choice but to evolve.

To remain a leader, intensive competition and ever-rising customer expectations require you to be a reliable, efficient and relevant partner.

Having the right spare part in the right place at the right time is strategic. Cohesion between multiple sales channels, margin control but also reference management are key issues. A common backoffice, an efficient, scalable and specialized supply chain, together with insightful real-time management and tracking tools are now essential. Retention and acquisition of new customers depend on it.

The distributors of the future are relentlessly innovating and prioritizing initiatives that create conditions for growth. We are proud to accompany them.

Authentic Distribution Solution

An industry-focused solution

Based on Infor CloudSuite™ Distribution Enterprise, Authentic offers distributors and wholesalers an innovative, pre-configured and micro-industry centered solution.

The ADS project

Faster, less expensive and delivering much more value

ADS project

- Framed project allowing for an accurate evaluation of effort, time and budget
- Pre-configured and pre-connected to your industry's leading expert software
- Reduced involvement from the in-house team

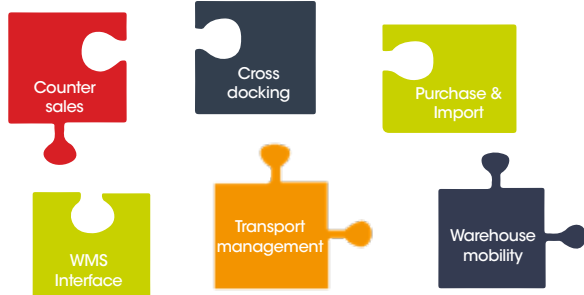

Traditional project

- Software modified to look like existing processes although possibly outdated
- Never-ending-looking project as add-ons pile up
- Substantial investment of internal resources over long periods of time

Componentized and easy to assemble

For a sustainable, agile and scalable IS

Select "à la carte" the processes and sub-processes you need. Your IS adapts easily and quickly to changes in your business model.

Solution assembly

Created in 2004, Authentic implements innovative IT solutions and services to support companies in their development. Authentic works with companies specialized in distribution in Europe and North America.
